LinkedIn: zeeshan-ml

ID: 14209-8547231-4 **Work permit:** Pakistani **Gender:** Male **Date of birth:** 20/05/2004 **Place of birth:** Islamabad, Pakistan **Nationality:** Pakistani

ABOUT ME

AI Engineering Student skilled in **machine learning**, **deep learning**, and intelligent system design. Experienced in developing end-to-end AI solutions integrating **predictive models**, **NLP**, and data-driven automation.

EDUCATION AND TRAINING

[20/09/2022 – Current]

Software Engineering

Bahria University https://bahria.edu.pk

City: Islamabad | **Country:** Pakistan | **Field(s) of study:** Engineering, manufacturing and construction: ● *Engineering, manufacturing and construction not elsewhere classified* | **Level in EQF:** EQF level 6

WORK EXPERIENCE

Doctor Usman

City: Islamabad | **Country:** Pakistan

[01/07/2025 – 01/09/2025]

Machine Learning Engineer

Developed a computer vision system to convert pixel distances into real-world measurements using Euclidean

algorithms. Built a mapping model for consistent calibration across different cameras and lighting conditions.

Designed a custom algorithm to extend distance estimation for advanced automation tasks.

CERTIFICATIONS

NLP with python

Complete guide to TensorFlow with Python for Deep Learning

Python for Data Science and Machine Learning

The Complete Power BI Practical Course 2025

PROJECTS

End-to-End MySQL Data Warehouse for AI-Driven Insights

Developed a unified MySQL-based data warehouse integrating user, transaction, and activity data to enable advanced analytics and AI-driven predictive insights.

PDF InsightBot – Context-Aware Q&A Chatbot

Built an intelligent document assistant using transformer-based models and semantic search to provide accurate, context-aware responses from PDFs.

AI-Powered Resume Scoring Platform

Developed an AI-powered system that analyzes resumes, scores them out of 100, and provides detailed feedback on strengths, weaknesses, and improvement areas.

E-Commerce Review Analysis (NLP + Sentiment Analysis)

Leveraged NLP techniques to analyze product reviews, extract sentiment, and uncover key customer insights — helping businesses improve products and customer satisfaction through data-driven feedback.

Personalized Recommendation Engine

Designed a hybrid recommendation engine combining collaborative and content-based filtering to generate intelligent, personalized recommendations.

SKILLS

Machine Learning | Python | NLP | Deep Learning | LLM | Time Series Forecasting | Data Cleaning | SQL | Scikit-Learn | Pandas | Matplotlib | Git | Numpy | Keras | Seaborn | TensorFlow | Data Analysis | TensorFlow | EDA | Power BI | Data Science | Tableau | Jupyter Notebook | Generative AI | Neural Networks and Deep Learning | Data Visualization
